

## Pestosaurus

People call me the monster of the town. I don't know why. I just delight seeing all the possums and rats munching on all the native plants. So what if they go extinct? All they do is eat, sleep and cover your lawn in bird poo!

Recently your technology has improved a lot. You upgraded your rat traps. Fenced off the deer. Sprinkled 1080 all through my lovely bush. I only have one question. WHY. All I'm doing is keeping things running smoothly, besides you are the ones who created me!

Me and my monster friends are doing our best to please you. Mole Miner was doing his job when hundreds of people showed up and started to insult him. Tenco Cow was doing her grocery shopping, when everyone threw tomatoes at her. SEE WHAT I MEAN! ALL WERE DOING IS OUR JOBS!

Sorry about that outburst early, it just makes me so MAD. Breeding pests, caring for pests is my hobby! It's like telling an eight year old girl to give up on her dreams of being an astronaut. You wouldn't do that to a human so why do it to me.

Now once again why do you care? All birds do is eat, sleep and cover your lawn in poo. You should be thanking me instead of whinging. My ears are sore from listening to your cries. All I'm doing is my job. I WANT JUSTICE!!!
